

## **American University Neighborhood Partnership Facilities Planning Working Group Summary**

August 10<sup>th</sup>, 2022

### Key Discussion Points:

- Welcome, review agenda and introduction
- Reeves Field Scoreboard
- Jacobs Field Sound Barrier
- Next Steps
- Adjourn

Summary: The Working Group meeting began with a welcome from the co-chairs and a review of the agenda for the meeting. Jonathan reviewed the planned replacement of the Reeves field scoreboard as part of the larger Jacobs Field project.

Next Jonathan and Kevin Miller, from Miller Beam, updated the group and steps taken since the meeting in July on the Jacobs Field Sound Barrier. They answered questions from the neighbors on how the amplified sound limiter will function. Kevin also presented to the group on the basics of acoustical measuring and noise mitigation techniques including details on the type of modeling software used. Neighbors had detailed questions for AU on how low-frequency components may affect readings, and what dates were used to take initial measurements. The meeting closed out by looking at the next steps and future dates for engagement with the group.
