

## **American University Neighborhood Partnership Transportation and Parking Working Group Summary**

November 21, 2019

### Key Discussion Points:

- Comprehensive Transportation Review and Timeline
- Pre-scoping Study Area
- Discussion: Guiding Principles

Summary: The group discussed the upcoming Comprehensive Transportation Review (CTR) for the campus planning process, the guidelines of the CTR have shifted from the last campus plan with an emphasis on the multitude of ways people commute to campus. Questions centered the length of time a CTR is conducted as well the number of intersections the study will take place in. AU also took suggestions on further intersections to review for the CTR. The meeting next looked at the physical area the campus plan will deal with; unlike the last campus plan, under new zoning regulation, AU will incorporate its properties on the Spring Valley campus and 3201 New Mexico Ave into their current process.

Beyond the CTR process AU is also working to develop a Transportation Demand Management (TDM) strategy and is seeking neighborhood input about the process. The meeting wrapped up by looking ahead at 2020 meetings dates and priorities.
