Facilities Project Planning Team

Background:

Facilities play an important role in supporting the university's educational mission. The Facilities Planning Project Team works collaboratively with students, faculty, and staff to assess the facilities needs of the university and make recommendations for improvements needed to create high quality experiences. The Team will report its progress and recommendations to Don Myers, Vice President of Finance and Treasurer.

Team Charge

In order to fulfill its responsibilities, the Team will:

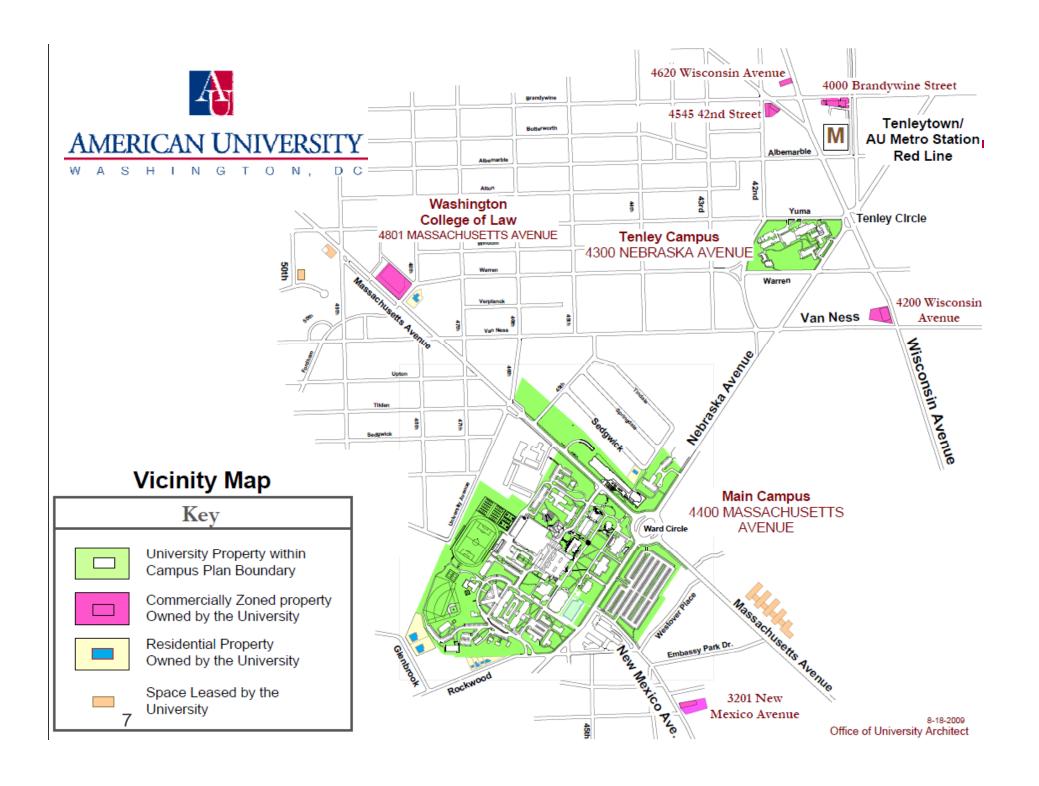

Identify and catalog facilities needs through review of current inventories of facilities requests, budget submissions, and periodic ad hoc requests for new and/or improved facilities.

Prioritize identified facilities needs consistent with the university's strategic priorities and annual action plans. Conclude the Team's work with sufficient time to provide meaningful input to the Campus Plan process.
