

[? SUBJECT 1: ?] To open Kurzweil 3000, click the program icon. You might first need to go to the launch pad to click and drag the icon onto the dock. Log in with your username and password that you receive from your Kurzweil email. Follow the first prompt to allow a network connection. You can read or skip the tip of the day. You will then notice the welcome document.

To be able to manage your reading settings, go to Window, then click Show reader. To read a file, click the Open icon on the toolbar. Then you can select a file from a storage location. Give it a minute for the file to fully load. You can then resize the window if you need. Set the highlighting, keep the text continually reading or click through, choose a voice type, listen to the voice, or just read with highlighting and adjust your speed settings. Let's listen to an example.

SUBJECT 2: This study [? analysis ?] the educational support offered through information and communication technology during formative assessment in two different cases in higher education.

SUBJECT 1: Please let us know if you need any help.
